- 📍 Mumbai , India

PROFILE SUMMARY

Motivated student seeking part-time opportunities with weekend and evening availability. Strong organizational and time management skills with a focus on gaining hands-on experience while contributing to team and company goals.

EDUCATION

ROYAL COLLEGE

- HSC- Computer Science

2024 - 2027

MUMBAI UNIVERSITY

- Bachelor of Engineering in IT
- GPA: 9.4/10

SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

LANGUAGES

- Languages: Java, Python, C Programming, JavaScript, SQL
- Frameworks: React, Express.js, Node.js
- Tools: GIT, GitHub, MySQL, SQLite

PROJECTS

Here's a brief overview of three projects that highlight my technical skills and experience:

- **Virtual Banking System:** Leveraging Java and MySQL, I developed a console-based banking system that facilitates essential banking operations such as account creation, fund transfers, and viewing transaction history. This project emphasized secure user authentication and utilized MySQL for reliable, persistent data storage, ensuring that user information and transactions are safely maintained.
- **Weather Forecast App:** This project involved building a responsive web application using JavaScript and the OpenWeatherMap API. The app allows users to input a location and receive real-time weather updates, including temperature, humidity, and forecast information. By incorporating dynamic JavaScript DOM manipulation, the app provides an interactive and engaging user experience.
- **Insta Feed Interface:** Using React.js, I developed a clean, Instagram-style feed interface that displays posts, likes, and captions. The project focused on creating a reusable design with a responsive layout, employing state management to ensure dynamic content rendering. This approach enhanced the user interface, allowing for a seamless and interactive browsing experience.
- **Speed-o-Type - Typing Speed Checker App (Web Development, React):** A React-based web app to test and analyze typing speed and accuracy in real time, providing detailed performance feedback. Tech: ReactJS, JavaScript. (2025).
